## Answers for Industry.

Siemens Industry answers the challenges in the manufacturing and the process industry as well as in the building automation business. Our drive and automation solutions based on Totally Integrated Automation (TIA) and Totally Integrated Power (TIP) are employed in all kinds of industry. In the manufacturing and the process industry. In industrial as well as in functional buildings.

Siemens offers automation, drive, and low-voltage switching technology as well as industrial software from standard products up to entire industry solutions. The industry software enables our industry customers to optimize the entire value chain – from product design and development through manufacture and sales up to after-sales service. Our electrical and mechanical components offer integrated technologies for the entire drive train – from couplings to gear units, from motors to control and drive solutions for all engineering industries. Our technology platform TIP offers robust solutions for power distribution.

Check out the opportunities our automation and drive solutions provide. And discover how you can sustainably enhance your competitive edge with us.

## General Information

The FLENDER gear unit series is a universal standard gear unit range developed for the use in nearly all fields of mechanical power transmission technology. Since the launching on the market, the gear units have proved their value in more than 80,000 drives where they are operating reliably.

With **Fast Track®**, Siemens now offers a **special selection** from its extensive gear unit range (for more types and sizes please refer to the main brochure MD 20.1; information about subranges on request). Ordering quantities of up to 3 **Fast Track®** gear units per type according to this brochure are available ex works, as a rule **within 21 working days** from the date of the order acknowledgement.

### Details required in orders:

- Type and size; design
- Transmission ratio
- Seals
- Add-on pieces
- Language and quantity required of documentation (operating instructions, dimensioned drawings, spare parts lists and spare parts drawings) and language for the name plates.

### The following items are absolutely to be observed!

- For other designs and dimensions please refer to the main brochure MD 20.1.
- For permissible radial forces, see main brochure MD 20.1.
- Gear units available with dip lubrication only.
- Gear units are protected against corrosion for 24 months.
- Inspection: test report 2.2.
- Illustrations are examples only and are not strictly binding. Dimensions are subject to change.
- The weights are mean values and not strictly binding.
- To prevent accidents, all rotating parts should be guarded according to local and national safety regulations.
- Prior to commissioning, the operating instructions must be observed. The gear units are delivered ready for operation but without oil filling.
- Oil quantities given are guide values only. The exact quantity of oil depends on the marks on the oil dipstick.
- The oil viscosity has to correspond to the data given on the name plate.
- Permitted lubricants may be used only. You will find current operating instructions and lubricant selection tables at: [www.siemens.com/gearunits](http://www.siemens.com/gearunits)

| Viscosity ISO-VG<br>at 104°F in<br>mm <sup>2</sup> /s (cSt) | Permissible temperature limit<br>in °F for dip lubrication |                |
|---|--|----------------|
|   | Mineral Oil  | Synthetic Oil* |
| VG 220  | 5  | -13            |
| VG 320  | 10   | -13            |
| VG 460  | 16   | -13            |

If the temperatures are below the values as listed in the table, the oil must be heated.

In case of dip lubrication, the oil temperature must not be below the pour point of the selected oil.

\*Synthetic oils according to PG or PAO designation

## Certified acc. to DIN EN ISO 9001

The General Terms and Conditions for the Supply of Products by Siemens AG are applicable.

## Guidelines for the Selection

The calculation example below applies to:

- Constant power rating at  $n_1 = 1500$  RPM
- Drive via electric motor with  $n = 1500$  RPM
- Max. 5 starts per hour with uniform direction of load
- Continuous operation 24h/day
- Installation in large halls, workshops (wind velocity  $w > 3.1$  mph)
- Altitude: up to 3,281 ft

For other operating conditions please refer to the main brochure MD 20.1.

### Service Factors

| Ambient Temperature | Thermal Factor                          |      |      |      |      |
|---------------------|---|------|------|------|------|
|                     | Operating Cycle per hour ( $E_D$ ) in % |      |      |      |      |
|                     | 100                                     | 80   | 60   | 40   | 20   |
| 50°F                | 1.11                                    | 1.31 | 1.60 | 2.14 | 3.64 |
| 68°F                | 1.00                                    | 1.18 | 1.44 | 1.93 | 3.28 |
| 86°F                | 0.88                                    | 1.04 | 1.27 | 1.70 | 2.89 |
| 104°F               | 0.75                                    | 0.89 | 1.08 | 1.45 | 2.46 |
| 122°F               | 0.63                                    | 0.74 | 0.91 | 1.22 | 2.07 |

| Load Classification of Driven Machine |  | $f_1$ |
|---------------------------------------|--|-------|
| uniform                               | Belt conveyors ≤ 201 HP; centrifugal pumps; centrifuges                        | 1.3   |
| moderate shock                        | Belt conveyors > 201 HP; mixers; apron conveyors; agitators; water screw pumps | 1.6   |
| heavy shock                           | Roller drives (rolling mills); breakers  | 2     |

### Example:

#### Known criteria:

##### PRIME MOVER

Electric motor:  $P_1 = 100$  HP

Motor speed:  $n_1 = 1500$  RPM

##### GEAR UNIT DESIGN

Bevel-helical gear unit

Mounting position: horizontal

Output shaft  $d_2$ : on RH side, design C

Direction of rotation of output shaft  $d_2$ : ccw

##### DRIVEN MACHINE

Belt conveyor:  $P_2 = 89$  HP

Speed:  $n_2 = 26$  RPM

Duty: 12h/day

Operating cycle per hour:  $E_D = 100\%$

Ambient temperature: 86°F

Installation in a hall: ( $w > 3.1$  mph)

Altitude: sea level

### Required:

Type and size of gear unit

#### 1. Selection of gear unit type and size

##### 1.1 Calculation of transmission ratio $i_N$

$$i_s = \frac{n_1}{n_2} = \frac{1500}{26} = 57.7 \quad i_N = 56$$

##### 1.2 Determination of the gear unit nominal power rating $P_N$

$$P_N \geq P_2 \times f_1 = 89 \times 1.3 = 115.7 \text{ HP}$$

Selected from power rating table: type B3, gear unit size 9, with  $P_N = 134$  HP

#### 2. Determination of thermal capacity $P_G$

##### 2.1 Thermal capacity without auxiliary cooling $P_{GA}$ acc. to table for type B3

$$P_G = P_{GA} \times f_4 = 86.8 \times 0.88 = 76 \text{ HP}$$

$$P_G = 76 \text{ HP} < P_2 = 89 \text{ HP}$$

##### 2.2 Thermal capacity with fan cooling $P_{GB}$ acc. to table for type B3

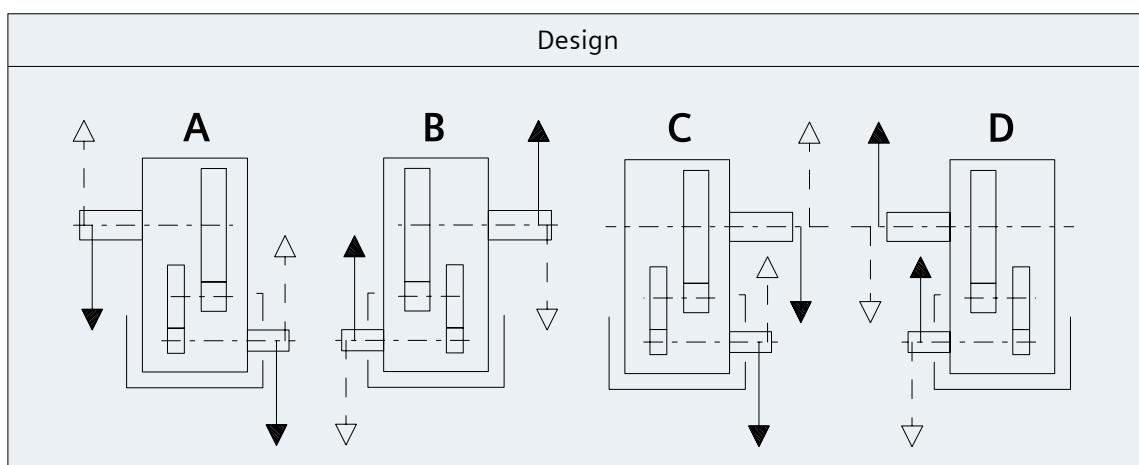

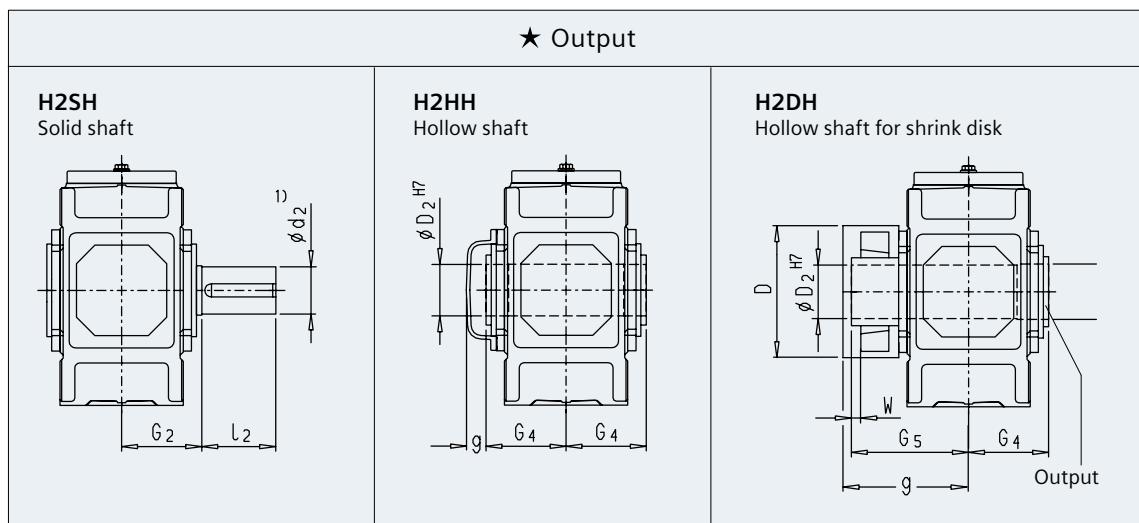

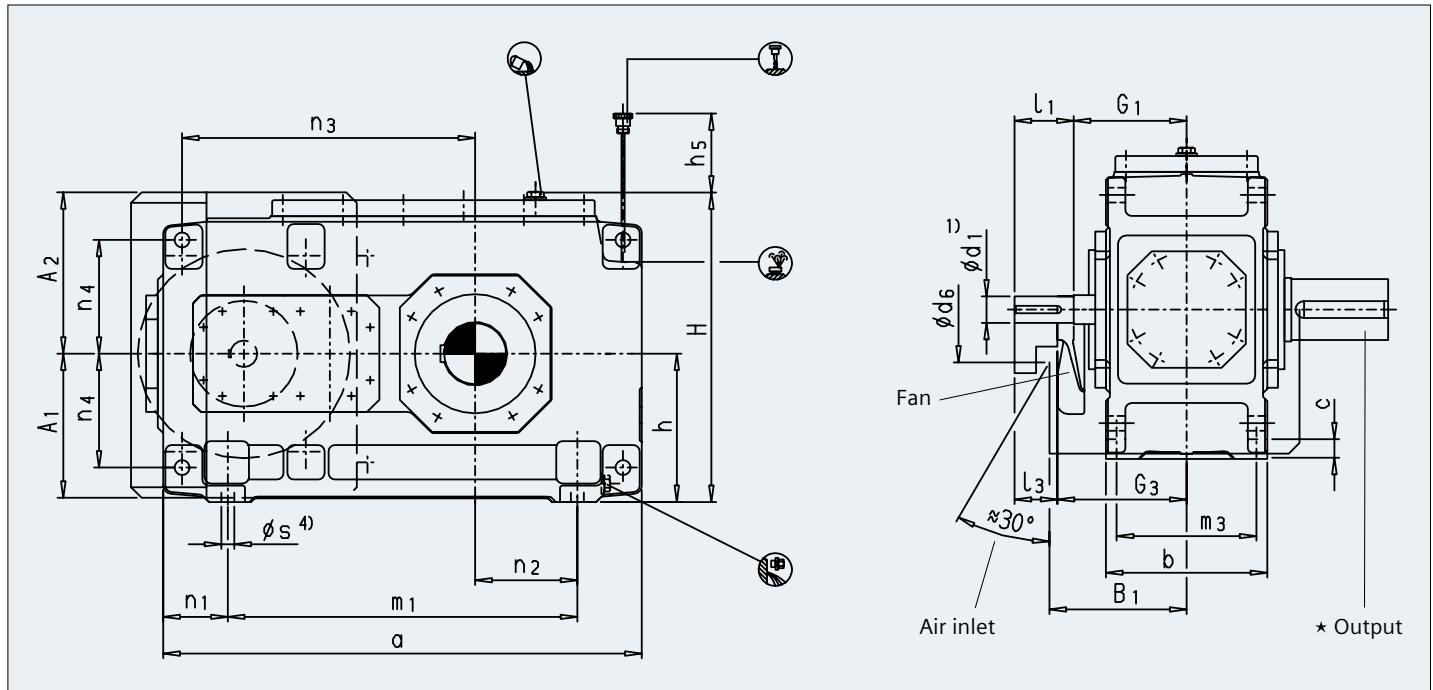

$$P_G = P_{GB} \times f_4 = 188.0 \times 0.88 = 165 \text{ HP}$$

$$P_G = 165 \text{ HP} > P_2 = 89 \text{ HP}$$

A gear unit without auxiliary cooling is not sufficient!

A gear unit with fan is sufficient!

# H2.H

|                |    | Nominal Ratios         |                        |                         |                         |                         |                          |                         |                          |                         |                         |                         |                         |                         |                         |  |

## Gear Units

### Hollow Shafts for Shrink Disks

Types H2, H3, H4, B3, B4; Sizes 5–12

<sup>1</sup> Shrink disk does not belong to our scope of supply. Please order separately, if required. In case of order, shrink disk will be supplied as loose item.

<sup>2</sup> Material of driven machine shaft: C60N or higher strength.

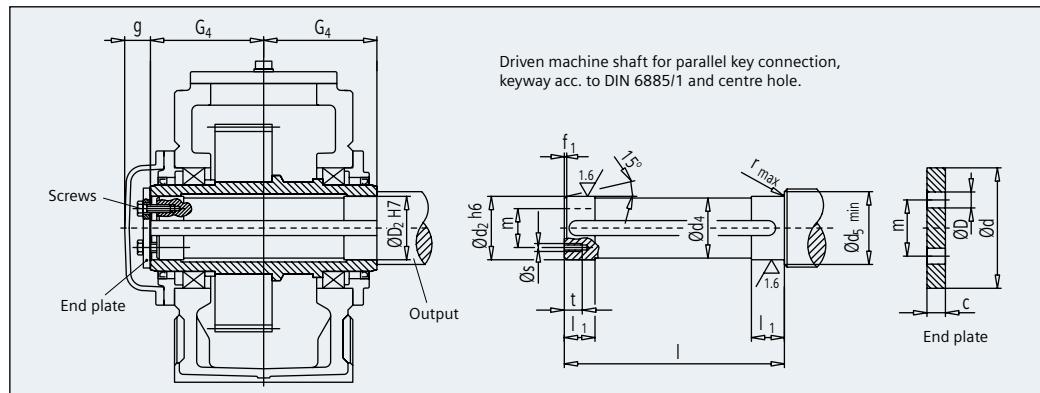

Shrink disk on machine side on request.

Types H2D., H3D., H4D., B3D., B4D.

### Hollow Shafts for Parallel Key Connections

Types H2, H3, H4, B3, B4; Sizes 5–12

<sup>1</sup> Material of driven machine shaft: C60N or higher strength.

Parallel key does not belong to our scope of supply. Please order separately, if required.

Types H2H., H3H., H4H., B3H., B4H.

## APPLICATION DATA

Application (e.g. Driven Machine): \_\_\_\_\_  
 Service Factor: \_\_\_\_\_ Based on  Demand Power  Motor Power  
 Requested Output RPM \_\_\_\_\_ Requested Ratio \_\_\_\_\_  
 Duty Cycle (hrs. per day):  ≤0.5 \_\_\_\_\_  0.5-10  >10  
 Direction of Output Rotation (view towards shaft end):  
 CW  CCW  Both  
 Peak Torque: \_\_\_\_\_  
 Peak Loads per hr.:  1-5  6-30  31-100  >100  
 Direction of Load:  Steady  Alternating  
 Rated Power P2: \_\_\_\_\_ [HP / kW] or Torque = \_\_\_\_\_ [ft.-lb. / N·m]  
 External Forces:

Radial: \_\_\_\_\_ Axial: \_\_\_\_\_ on Shaft  LSS  HSS  
 Minimum Bearing Life: \_\_\_\_\_ hrs. (L10)

## SITE/INSTALLATION DATA

Altitude (ft.):  <3,200  <6,400  <9,600  >9,600  
 Ambient Temperature Range: \_\_\_\_\_ to \_\_\_\_\_ [°F / °C]  
 Environment:  High Dust  Explosion Hazard  
 Location:  Indoors – Confined Space  Outdoors  
 Indoors – Large Hall  
 Cooling Water Available:  Y  N Temp: \_\_\_\_\_ [°F / °C]

*NOTE: If application data is unknown, default values will be used for calculations.*

Sketch and/or description of application including external forces or erratic operation (starts/stops, braking, etc.) or other accessories:

Return the completed form via fax to 678.297.7458 or email to gearunits.industry@siemens.com. You can also complete the form on-line at usa.siemens.com/gearboxes.

Dimensions in:  Inches  Metric

## PRIME MOVER (PM)/INPUT DRIVER DATA

Type:  Electric Motor  Other  
 Power: \_\_\_\_\_ [HP / kW] Volts / ph / Hz: \_\_\_\_\_  
 Speed: \_\_\_\_\_ RPM or Range (e.g. for VFD) \_\_\_\_\_  
 Design Standard:  NEMA  IEC  Other Frame: \_\_\_\_\_  
 Controller: AAL / Y-D / VFD / Other \_\_\_\_\_  
 Protection: ODP / TEFC / X-Proof \_\_\_\_\_  
 Drive Method:  Coupling  Pulley  Flange  
 PM Source:  I would like Siemens to also quote a motor

## COUPLINGS

Please quote coupling for:

High-Speed Shaft Preferred Type: \_\_\_\_\_  
 Low-Speed Shaft Preferred Type: \_\_\_\_\_  
 DBSE: \_\_\_\_\_ PM Shaft Size: \_\_\_\_\_

## GEARBOX SELECTION

- Any, per Siemens recommendation or specify:  
 Gear Type  
 Parallel (Helical)  Right-Angle (Bevel)  Planetary  
 Output Shaft Type  
 Hollow  Solid  
 w/ Shrink disk  Flanged  
 w/ Keyway  Other  
 w/ Splines  
 Output Mounting Style  
 Horizontal  Wall-Mount  Vertical  
 Up  Down  
 Equipment needed on-site:  
 ASAP to 6 months  
 6 months to 1 year  
 >1 year or more  
 Other

Quantity Needed: \_\_\_\_\_
