Details

Description

Even large containers are filled quickly when vacuuming at high power. High capacity also means a lot of weight that needs to be moved for emptying. The tilting chassis of the new NT 70-family scores twice as many points in this regard: Once moved into place for emptying, the container made of plastic or metal is simply lifted and emptied using the robust handle. It saves time and is gentle to your back.

Application

With the NT 70-series you can choose between one, two or three motors. All of them can be switched on or off on the front depending on the job. The accessory holder is integrated into the large bumper. All of the accessories are included in the package.

Features & Benefits

- Tilting chassis - Stainless steel container - Ergonomic pushbar - Wet filter optional
