Details

Description

Cleans floors like tiles, marble, rubber floors, linoleum or PVC quickly and thoroughly. The brush pressure is adjustable on the requirements of the surfaces or of the level of soiling. The light weight of the plastic chassis and the wide sweep of the suction beam make the machine exceptionally easy to manoeuvre (1.6-metre turning circle) around corners and obstacles. Through the light weight the machine is suitable for pressure-sensitive soils for instance sports halls. As the machine is line-operated it can be used temporally unlimited. The ergonomic design of this floor scrubber permits relaxed operation.

Application

Optimal for free areas. Ideal for hard and resilient floors, e.g. in supermarkets, hospitals, sports arenas, for contract cleaners, trade or small industrial companies.

Features & Benefits

Attractively designed and compact double-wall tank-in-tank-housing. Easy manoeuvrable machine. Provide an outstanding cleaning performance even on different kinds of floor surfaces. Easy and convenient to operate. Newly developed large drain outlet. Fast cleaning of the fresh water tank. Newly developed suction channel integrated in the housing cover. Reduces odours and thus takes care for a long pleasant operation. The suction channel cover can be removed without any effort. The suction channel is cleaned very quickly which provides a constant suction performance. Only a few, very good understandable operation elements. No linguistic proficiency necessary! Very light robust plastic frame for easiest manoeuvring. With new integrated fresh water level control. For a lower consumption of detergent-agents and drinking water. The unidirectional brushes arrange an automatic propulsion of the machine and allow relaxed and fatigue-free operation.
