## Details

### Description

The starting model is mainly suitable for easy tasks on small up to middle-sized areas. The compact machine is tailored on the cleaning tasks of e.g. hotels and rooms with highly obstructed areas. The operator's elements are arranged ergonomically at the handle. The slope of the handle can be adjusted optimally on the user's size by the hinge. The two big transport wheels relieve the transport of the machine also up and down stairs and on uneven floors. The machine housing has a maximal corrosion protection also in severe application.

---

### Application

Single disc machine for stripping of PVC and linoleum floors, for deep cleaning of tiles and marble, for buffing of coatings, for crystallising of calcareous floors like e.g. marble, for polishing of e.g. sealed wooden floors, for shampooing of carpets and for carpet intermediate cleaning with micro fibre pads.

---

### Features & Benefits

Abrasion-proof bumper. Saving of furniture and walls against damages. Cable storage at the machine and devices for the mounting of the RM-tanks. Facilitates the mounting of accessories as well as the storage of the machine. Easy change of brushes. Low wear connection system (metal/metal) allows a long life-time. Robust planetary gear. Optimal turning moment with high capability. The central placed drive provides an even contact pressure and a smooth running of the machine. The operating of the machine is facilitated by an easy handling.
